REAL WORLD ASSET TOKENIZATION IS BROKEN

The Problem

This problem on
scales with the
markets Growth

The Problem

This adds up to billions of
dollars lost (\$1.4bn /yr as
of 2025)

The Problem

in today's DeFi market, RWA
tokens slip off their peg,
causing impermanent loss for
liquidity providers and slippage
for users.

**RWA IS EXPECTED TO REACH
\$30 TRILLION BY 2030**

Looking Forward

At the current pace of asset tokenization these losses could stack up to \$10bn/Year for LP's and Users just because of tracking errors. Total losses could reach hundreds of billion in the meanwhile.
